Ballast bonding

View of ballast bonding on site

Railway track deformation

Contracting authority

TMR SA
Case postale 727
CH-1920 Martigny
Mr. Marc Vaudan

Application date

September 2020

Key elements of the project:

Application length
2 x 70m

Application width
40 cm

Application depth
35 cm

Total quantity applied
313 litres

Work duration
4 hours

Project description

On the TMR railway network, problems of rail deformation occur regularly.

In order to avoid this deformation of the rails, a 70m bonding test was carried out on the Salvan railway line on both sides of the sleeper heads.
