Ballast bonding

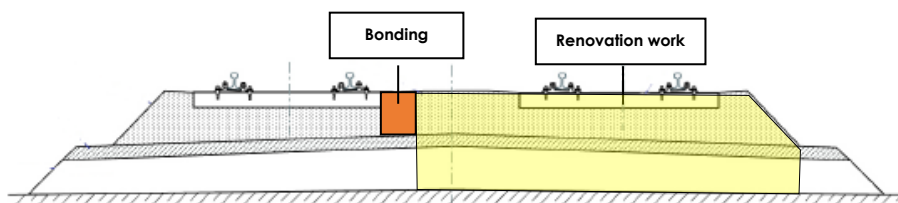

View of the uncovered bonding ballast

Project description

As part of the project in Oerlikon, a track reconstruction was carried out.

In order to extend the track and to carry out the reconstruction, a ballast bonding was realized on the secondary track.

The secondary track could thus remain in operation on the very busy line and the other track could be safely rebuilt.

Contracting authority
Swiss Federal Railways
Remisenstrasse 7
8021 Zürich
Mrs. Jacqueline Kaufmann

Application date
August 2021

Key elements of the project:
