

Rorschach railway station Rorschach / Canton of St Gall / Switzerland

Ballast bonding

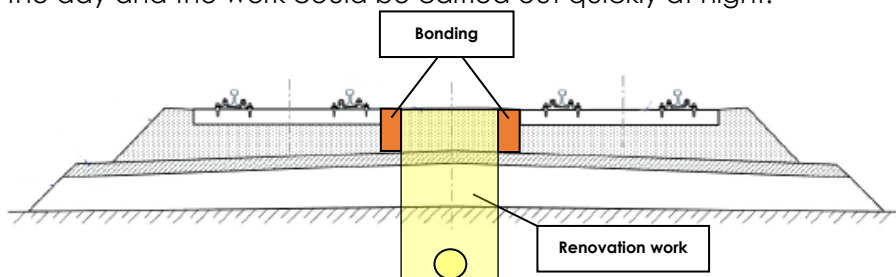

View of the section to be bonded for the central drainage

Project description

As part of the project in Rohrschach, various works such as rehabilitation works, new platform construction and a new central drainage system were carried out.

In order to construct the new platform and the new central drainage system, various ballast bonding measures were implemented.

The heavily used tracks could thus remain in operation during the day and the work could be carried out quickly at night.

Contracting authority

Walo Bertschinger AG
Eastern Switzerland
Schuppis 21
