

Construction of a ballast tank - Strahlloch Bridge- Wassen / Canton of Uri / Switzerland

Ballast bonding

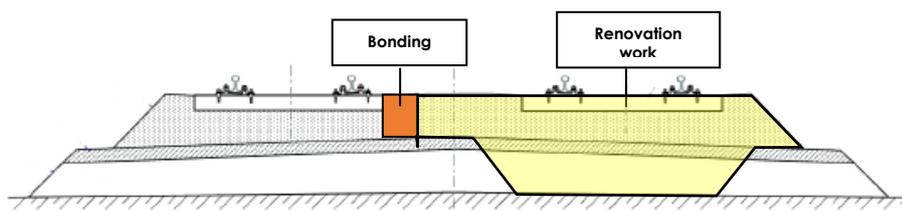

View on the application

Project description

As part of the project, a new ballast tank was built at the Strahlloch bridge in Wassen.

In order to realise the renewal, a ballast bonding was realised.

The secondary track could thus remain in operation on the very busy line during the construction work.

Contracting authority

Swiss Federal Railways
Bahnhofstrasse 12
4600 Olten
M. Roman Meyer
